'Knox' Security Fencing brochure

Feb 2012

✓ safety

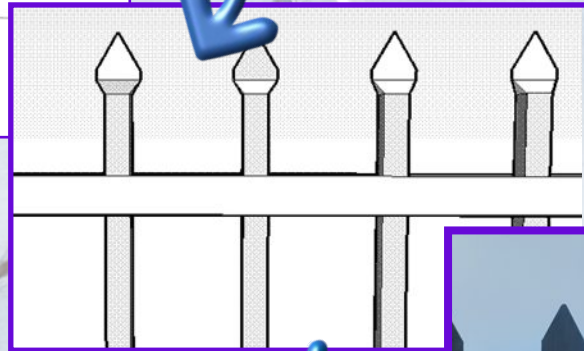

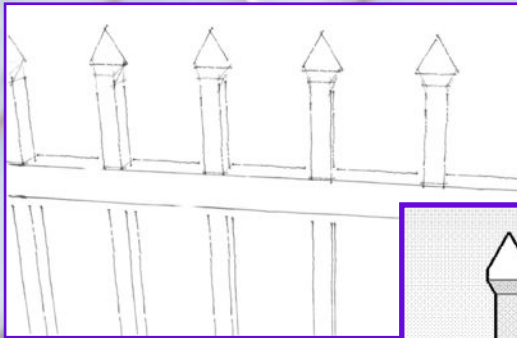

✓ security

✓ style

At Fence and Gate Supplies, we realise that the most major concerns for builders and developers today are site security and safety for both completed and incompleted projects . That is why we now stock a range of ultra heavy duty fencing, known as the Fort range.

This 'Knox' style fencing is manufactured from quality galvanised steel, and has 40mm x 40mm top and bottom rail, with 25mm square uprights. It is a thru-rail, welded design which is virtually indestructible, and discourages even the most determined trespassers.

This security fencing comes in a classic black powdercoat-ed finish. Other colours are available if desired.

Design. Plan. Make.

P: 1300 640 643

• Strong

• Durable

• Attractive

Panel length	Panel Height	Uprights (thru-rail)	Rail
2400	2100	25mm x 25mm	40mm x 40mm
2100	2400	25mm x 25mm	40mm x 40mm

* As part of our continual product reviews, specifications may change without notice

- Welded design for superior strength
- High bottom rail so pickets can be cut to suit ground slope without compromising security
- Supplied with a powdercoat finish
- Complies with all relevant Australian standards
- Many other styles and sizes available - check out our web site: www.fenceandgate.net.au
