

Glass balustrade

The Ultimate in Balustrade

Modern and stylish.
Our glass balustrade system enables you to have a safe and secure balcony, deck or patio without compromising looks or hindering the view from your outdoor area.

Manufactured with powder coated aluminium frames and 8 mm thick laminated glass. Glass is stocked in clear only, however we can organise tinting for added privacy or to match your décor if you require.

Suitable for both internal and external applications, this gives the finishing touch you require for your project.

Suitable for both internal and external applications, this gives the finishing touch you require for your project.

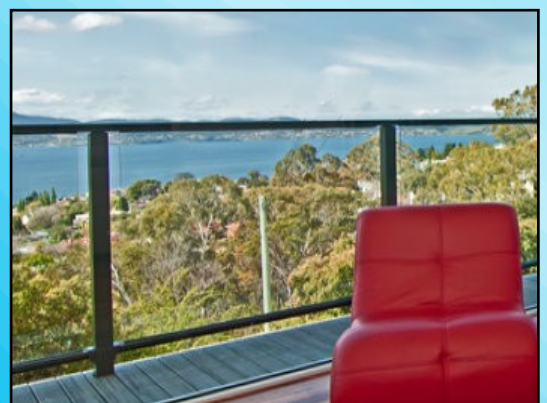

Specification & Test Data

Fence and Gate Supplies' glass balustrade system, not only offers stylish, modern looks, but amazing strength and safety too. The system meets or exceeds the following Australian Standards:

AS/NZS1170.1:2002 (Private Dwellings)

AS/NZS1664.1:1997 (Aluminium Structures)

AS1926.1 - 1993 (Fencing for Swimming Pools)

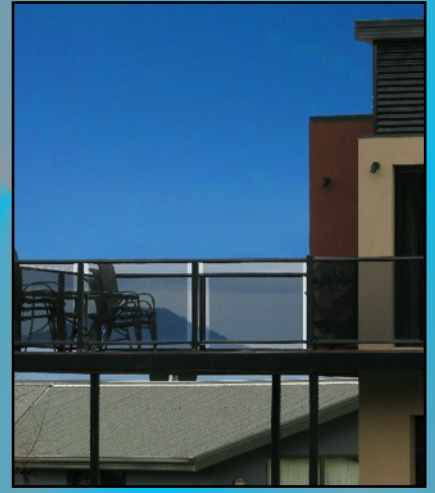

Smart. Stylish. Safe.

Smart.

Safe.

Stylish.

NOTE:

1. Fence and Gate Supplies' glass balustrade system is primarily intended for use in residential balustrade and pool fence applications. If used for any other application, it may be subject to conditions which it was not designed for, and this may lead to serious injury as a result.
2. Customers and fabricators of this glass balustrade system should consult a building design consultant to confirm that the system is suitable for the purpose intended. This is particularly important where it is proposed to use the balustrade system in a manner which is different from that contained in the testing as performed above, especially in high rise building applications.
